DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Knappe et al. (U.S. Patent No. 6,603,774).

Referring to claim 1, Knappe et al. discloses a method of compensating within a receiving endpoint (endpoint, col. 1 line 55-col. 2 line 21) for lost audio packets transmitted across an IP network (packet network 18, col. 2 lines 44-63), comprising the steps of:

storing a packet buffer of samples (sample buffer, col. 4 line 60) as a plurality of sub packets (compressed frames, col. 4 line 65-col. 5 line 1) within a buffer;

inserting at least one interpolated (interpolated, col. 5 lines 35-43) sub packet between successive sub packets in said buffer; and

playing out (sent, col. 5 lines 40-45) said sub packets from said buffer.

Referring to claim 5, Knappe et al. discloses the method of claim 1, further comprising the step of inserting interpolated sub packets between every other one (one or two, col. 5 lines 35-43) of said sub packets in said buffer.

Allowable Subject Matter

3. Claims 2-4 and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
